

## Call for papers – VET Congress 2 – 4 February 2022

### SUBMISSION: INDIVIDUAL PAPER PRESENTATION

Please submit via ConfTool (<https://www.conftool.net/vet-congress-2022/>)

- a short abstract of 100-300 words (for the programme and if you submit a symposium summary); **and**
- an extended summary of 1000-1200 words. The extended summary should include information on the theoretical and methodological approach used as well as the findings obtained;
- instead of submitting an extended summary, you may submit a full paper.

### SUBMISSION: SYMPOSIUM

- Symposia examine a single topic in depth from a range of perspectives, providing a coherent set of papers for discussion. Symposia sessions consist of three or four presentations and a contribution by a discussant. In each symposium, the participants come from at least two countries.
- The organizer of the symposium will need to submit the abstract for the symposium topic as well as the names of all contributors, the title of their presentations, and their short abstracts. The organizer does not need to upload extended summaries or papers for each individual contribution. This will be done by the presenters.
- The presenters of a symposium proceed with their individual paper in the same way as presenters of an "Individual Paper Presentation" (see above): They need to submit a short abstract and either an extended summary or a full paper for their individual contribution (please choose the option "Individual paper within a symposium" for your submission). In addition, please mark your upload with "SY" before the title.
- Please submit your proposal via ConfTool (<https://www.conftool.net/vet-congress-2022/>). A symposium proposal will either be accepted or declined as a whole. If the symposium is rejected as a whole but an individual paper within the symposium receives a high rating in the review process, it may be included in the programme as an individual paper presentation. In this case, the authors will be contacted by the organizers.

### SUBMISSION: POSTER PRESENTATION

Please submit via ConfTool (<https://www.conftool.net/vet-congress-2022/>)

- a short abstract of approximately 300 words. It should describe the research question, the theoretical and methodological approach used, and the findings obtained.

### REVIEW CRITERIA

Submissions will be assessed on the basis of these review criteria:

- Significance for theory, practice, or policy in VET
- Theoretical framework
- Clarity of research questions
- Research design and method(s)
- Presentation of (preliminary) results
- Overall quality
- Additionally for symposia: organization and internal logic of the whole symposium

Please ensure that you can at least refer to preliminary results in your submission.

Deadline for submission is **15 August 2021**.
